

1.Document Extraction and Structuring

Role: Read and extract information from marketing documents (Word, PDF, PowerPoint).

Inputs: The raw document.

Outputs: A structured representation (title page, slides, disclaimers, data tables, etc.).

Tasks:

- Split the document into logical parts.
- Extract key information: fund name, client type (retail/professional), language, countries, etc.
- Pass the cleaned text to the next agents

2.Data Validation & Compliance Agent

(Merged: Disclaimers & Risk + Data Consistency)

Role:

Check the accuracy of data and the presence of mandatory legal disclaimers.

Based on:

- “About Disclaimers” section in Consignes.pdf
- “General Rules” section and related parts in the Word document

Tasks:

- Detect if the document targets retail or professional clients.
- Check for all required disclaimers:
 - Performance disclaimer
 - Issuers mentioned
 - Back-tested or simulated performance
 - “New offer” mention if applicable
- Verify that disclaimers are visible and properly formatted (same font size, near related text).
- Ensure all data, charts, and figures have source + date.
- Compare performance or numerical data with the official references (Prospectus, KID, SFDR).
- Flag any missing disclaimers or data inconsistencies.

2.Data Validation & Compliance Agent

INPUTS

OUTPUT

JSON Report File

3.ESG Compliance Agent :

Role:

Ensure that ESG (Environmental, Social, and Governance) communication matches the fund's official ESG level.

Based on:

Section 4.1 – ESG Mentions from the Word document.

Tasks:

- Identify the fund's ESG category:
 - Engaging: $\geq 20\%$ exclusions + $\geq 90\%$ portfolio covered → no limit
 - Reduced: limited → max 10 % of text can mention ESG
 - Limited: ESG only allowed in the prospectus (not in marketing docs for retail)
- Measure the proportion of ESG-related text.
- Flag violations (e.g. ESG mentioned in a non-ESG fund or too frequently).

4.Document Structure Agent:

Role:

Verify that the presentation layout and order follow compliance standards.

Based on:

Sections 2–5 of the Word document.

Tasks:

- Ensure a title page includes:
 - Fund name, document date, “Promotional Document” mention, client type.
- Confirm slide 2 contains the risk disclaimer and authorized countries.
- Make sure performance is not on the first slide.
- Verify that:
 - Retail documents include a glossary.
 - The management company’s legal notice appears at the end.
- Check structural consistency (headings, numbering, format).

5.Evaluation & Registration Agent :

Role:

Perform the final evaluation after all other agents complete their checks, combine their findings, and verify fund registration authorization.

Based on:

Consignes.pdf and the Registration of Funds file.

Tasks:

- Collect all reports from previous agents.
- Compare countries mentioned in the document to the official Registration list.
- Compute a global compliance score (0–100 %).
- Summarize issues by category (disclaimer, ESG, structure, etc.).
- Generate a final annotated compliance report.
- Send the report to the human compliance reviewer for validation.

Example output:

 Compliance Score : 92 %

 Missing ESG disclaimer on slide 4

 Country “Spain” not authorized for distribution

1.Document Extraction and Structuring

Role: Read and extract information from marketing documents (Word, PDF, PowerPoint).

Inputs: The raw document.

Outputs: A structured representation (title page, slides, disclaimers, data tables, etc.).

Tasks:

- Split the document into logical parts.
- Extract key information: fund name, client type (retail/professional), language, countries, etc.
- Pass the cleaned text to the next agents

2.Disclaimer Compliance Agent

Role: Check that the correct legal disclaimers are included depending on the document type.

Based on: The “About Disclaimers” section in Consignes.pdf and the “**General Rules**” section in the Word file.

Tasks:

- Detect whether the document is retail or professional.
- Check for required disclaimers:
 - Performance
 - ESG Risk
 - Issuers mentioned
 - Back-tested performance
 - Simulation of future performance
 - SRI / Risk warning
 - New Offer
- Verify that disclaimers are visible (bold, same font size, near related text).
- Output missing disclaimers with rule reference.

3.ESG Compliance Agent

Role:

- Verify that ESG communication aligns with the fund’s ESG approach level.

Based on:

- Section 4.1 of the Word file.

Tasks:

- Identify if the fund’s ESG level is Engaging, Reduced, or Limited.
- Control communication limits:
 - Engaging → no limit (full ESG allowed)
 - Reduced → max 10% of text volume about ESG
 - Limited → ESG mention forbidden (except for pro clients)
- Flag any forbidden ESG mention.

4.Data Consistency Agent

Role: Verify that numerical data, sources, and charts match the official documents (Prospectus, KID, SFDR).

Based on: Word rules (“All data, charts, and figures must include source and date”).

Tasks:

- Check that each chart includes source + date.
- Validate numbers against the prospectus or SFDR annex.
- Flag inconsistencies.

5.Document Structure Agent

Role: Check that the presentation follows the official format and order.

Based on: Sections 2–5 of the Word document.

Tasks:

- Confirm presence of a title page with:
 - Fund name, date, “Promotional document” label, client type.
- Check slide 2 includes: disclaimer + risk profile + countries.
- Ensure performance is not on the first slide.
- Verify glossary at the end for retail docs.
- Confirm legal notice of the management company on the last page

6.Registration Agent

Role: Check if the fund is authorized for sale in the countries mentioned.

Based on: “Registration of Funds” Excel file from Consignes.pdf.

Tasks:

- Compare countries listed in the presentation to those in the registration document.
- Skip this check for new products (metadata flag).
- Flag unauthorized country mentions.

 **Example:** “⚠ Spain listed as distribution country, not registered in Registration.xlsx.”
