ODDO BHF

Rooted in *Europe*,
driven by *an international vision*

Deeply rooted in Europe, we are committed to promoting our expertise globally. We are fortunate to have more than 70,000 clients, institutional investors, companies, distribution partners and large private clients whose financial assets we advise, manage, and invest for a total amount of 156 billion euros. Our mission is to grow these assets through our four businesses.

Private Wealth Management

We develop customized investment and solutions for entrepreneurial families and their family offices, high-net-worth individuals and foundations. Our goal is to preserve and grow our clients' wealth, allowing them to pass it on successfully to the next generation.

Investment Banking

In all our businesses - equity and fixed income Research & Brokerage, corporate finance, institutional fund platform - strong values of independence, excellence and entrepreneurship guide us in the way we conduct our businesses. Our presence in Europe and around the world, our market expertise and deep understanding of our clients' needs enable us to seize for them the best opportunities. Thanks to these assets, our clients view us as a financial partner of choice.

Asset Management

Whether listed securities, private assets, or savings products: our global Asset Management offering covers all asset classes and investment solutions for our clients and partners. In each of our three businesses - asset management, private assets and financial advisory - we seek to create sustainable value for them, in line with their expectations and investment objectives.

Asset Servicing

We offer banks, asset managers and life insurers a comprehensive range of front-to-back solutions. These include the management of custody accounts for management companies and the handling of administrative, operational and IT tasks for private banks and life insurers. In addition, we act as a custodian bank for listed and unlisted investment funds and maintain the unitholder register for these funds.

Key Users

Data Excellence

Compliance Team (4 users)

Phase	Summary	Expected output
Scoping	- Define business objectives and compliance requirements - Analyze current presentation formats and validation workflows - Identify key data sources (e.g., disclaimers, SRI, footnotes, ESG mentions)	- Questions related to business context - Project plan and selected technologies
Development	- Design GenAI solution architecture and rule-based automation logic - Develop check modules for (Disclaimer detection, Risk profile validation, etc.) - Prepare user interface and feedback mechanisms	MVP for automated compliance checks on marketing
Testing	- Conduct internal testing with sample presentations - Validate outputs with business/DEX teams - Collect feedback and refine rules and GenAI prompts based on test results	- Enhanced MVP based on user feedback - Project documentation
